# The value of green in urban development: The use of a Digital Twin

Joyce Zwartkruis, Ton de Nijs,  
and many others

# Outline

- > What is the Green benefit planner?
- > Connection with digital twins in ESRI & Tygron
- > Application by municipalities
- > Lessons learned and ambitions

# Societal challenges

- > Residential building
- > Employment
- > Energy transition
- > Mobility
- > Livability
- > Health
- > Climate adaptation
- > Climate mitigation
- > Biodiversity
- > Etc....

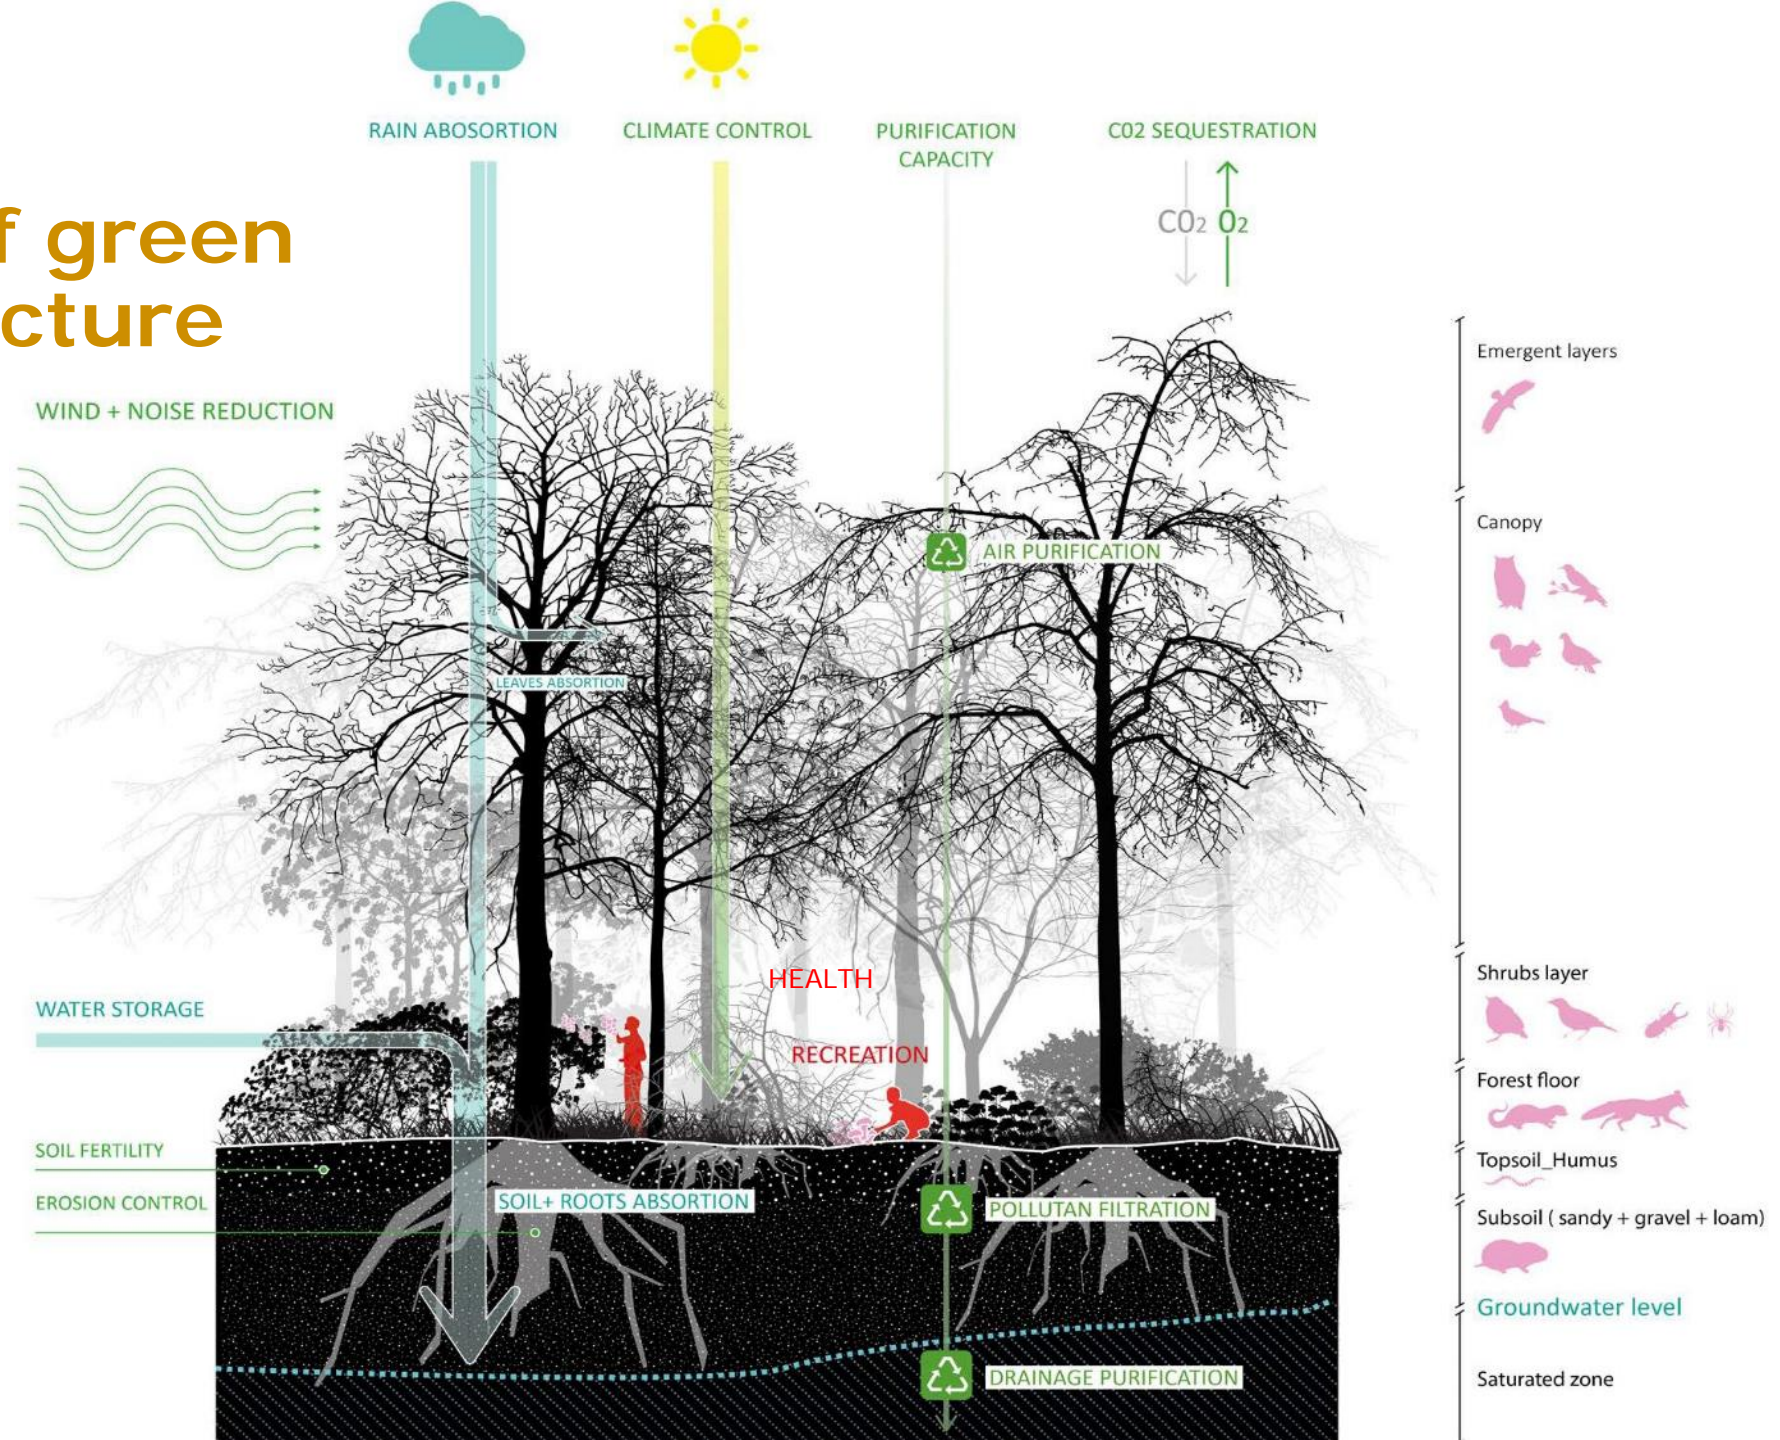

Table 1. Change in green area in cities in ha per time period (based on Landsat satellite data)

Periode:	1984 - 1989	1989 - 1999	1999 - 2006	2006 - 2015
Den Haag	-60	-56	-25	+5
Utrecht	-141	-38	-82	+3
Rotterdam	-129	-53	-38	-3
Amsterdam	-44	-40	-24	+2
Heel Nederland	-19542	-7180	-5002	+2077

# Benefits of green infrastructure

# GreenBenefitPlanner

## Estimation of Benefits Ecosystem Services

Commissioned by LNV  
Collaboration PBL, WEnR, CBS

### Health

Avoided patients patients / year

Avoided health - related labour cost euro / year

### Physical activity

Cycling min / year

### Air quality

Pm10 retention kg / year

### Urban cooling

Average temperature decrease °C by area

### Real estate

Increase in real estate value euro / year

### Water storage

Additional storage in green areas m<sup>3</sup>

### Carbon storage

Additional carbon storage kg

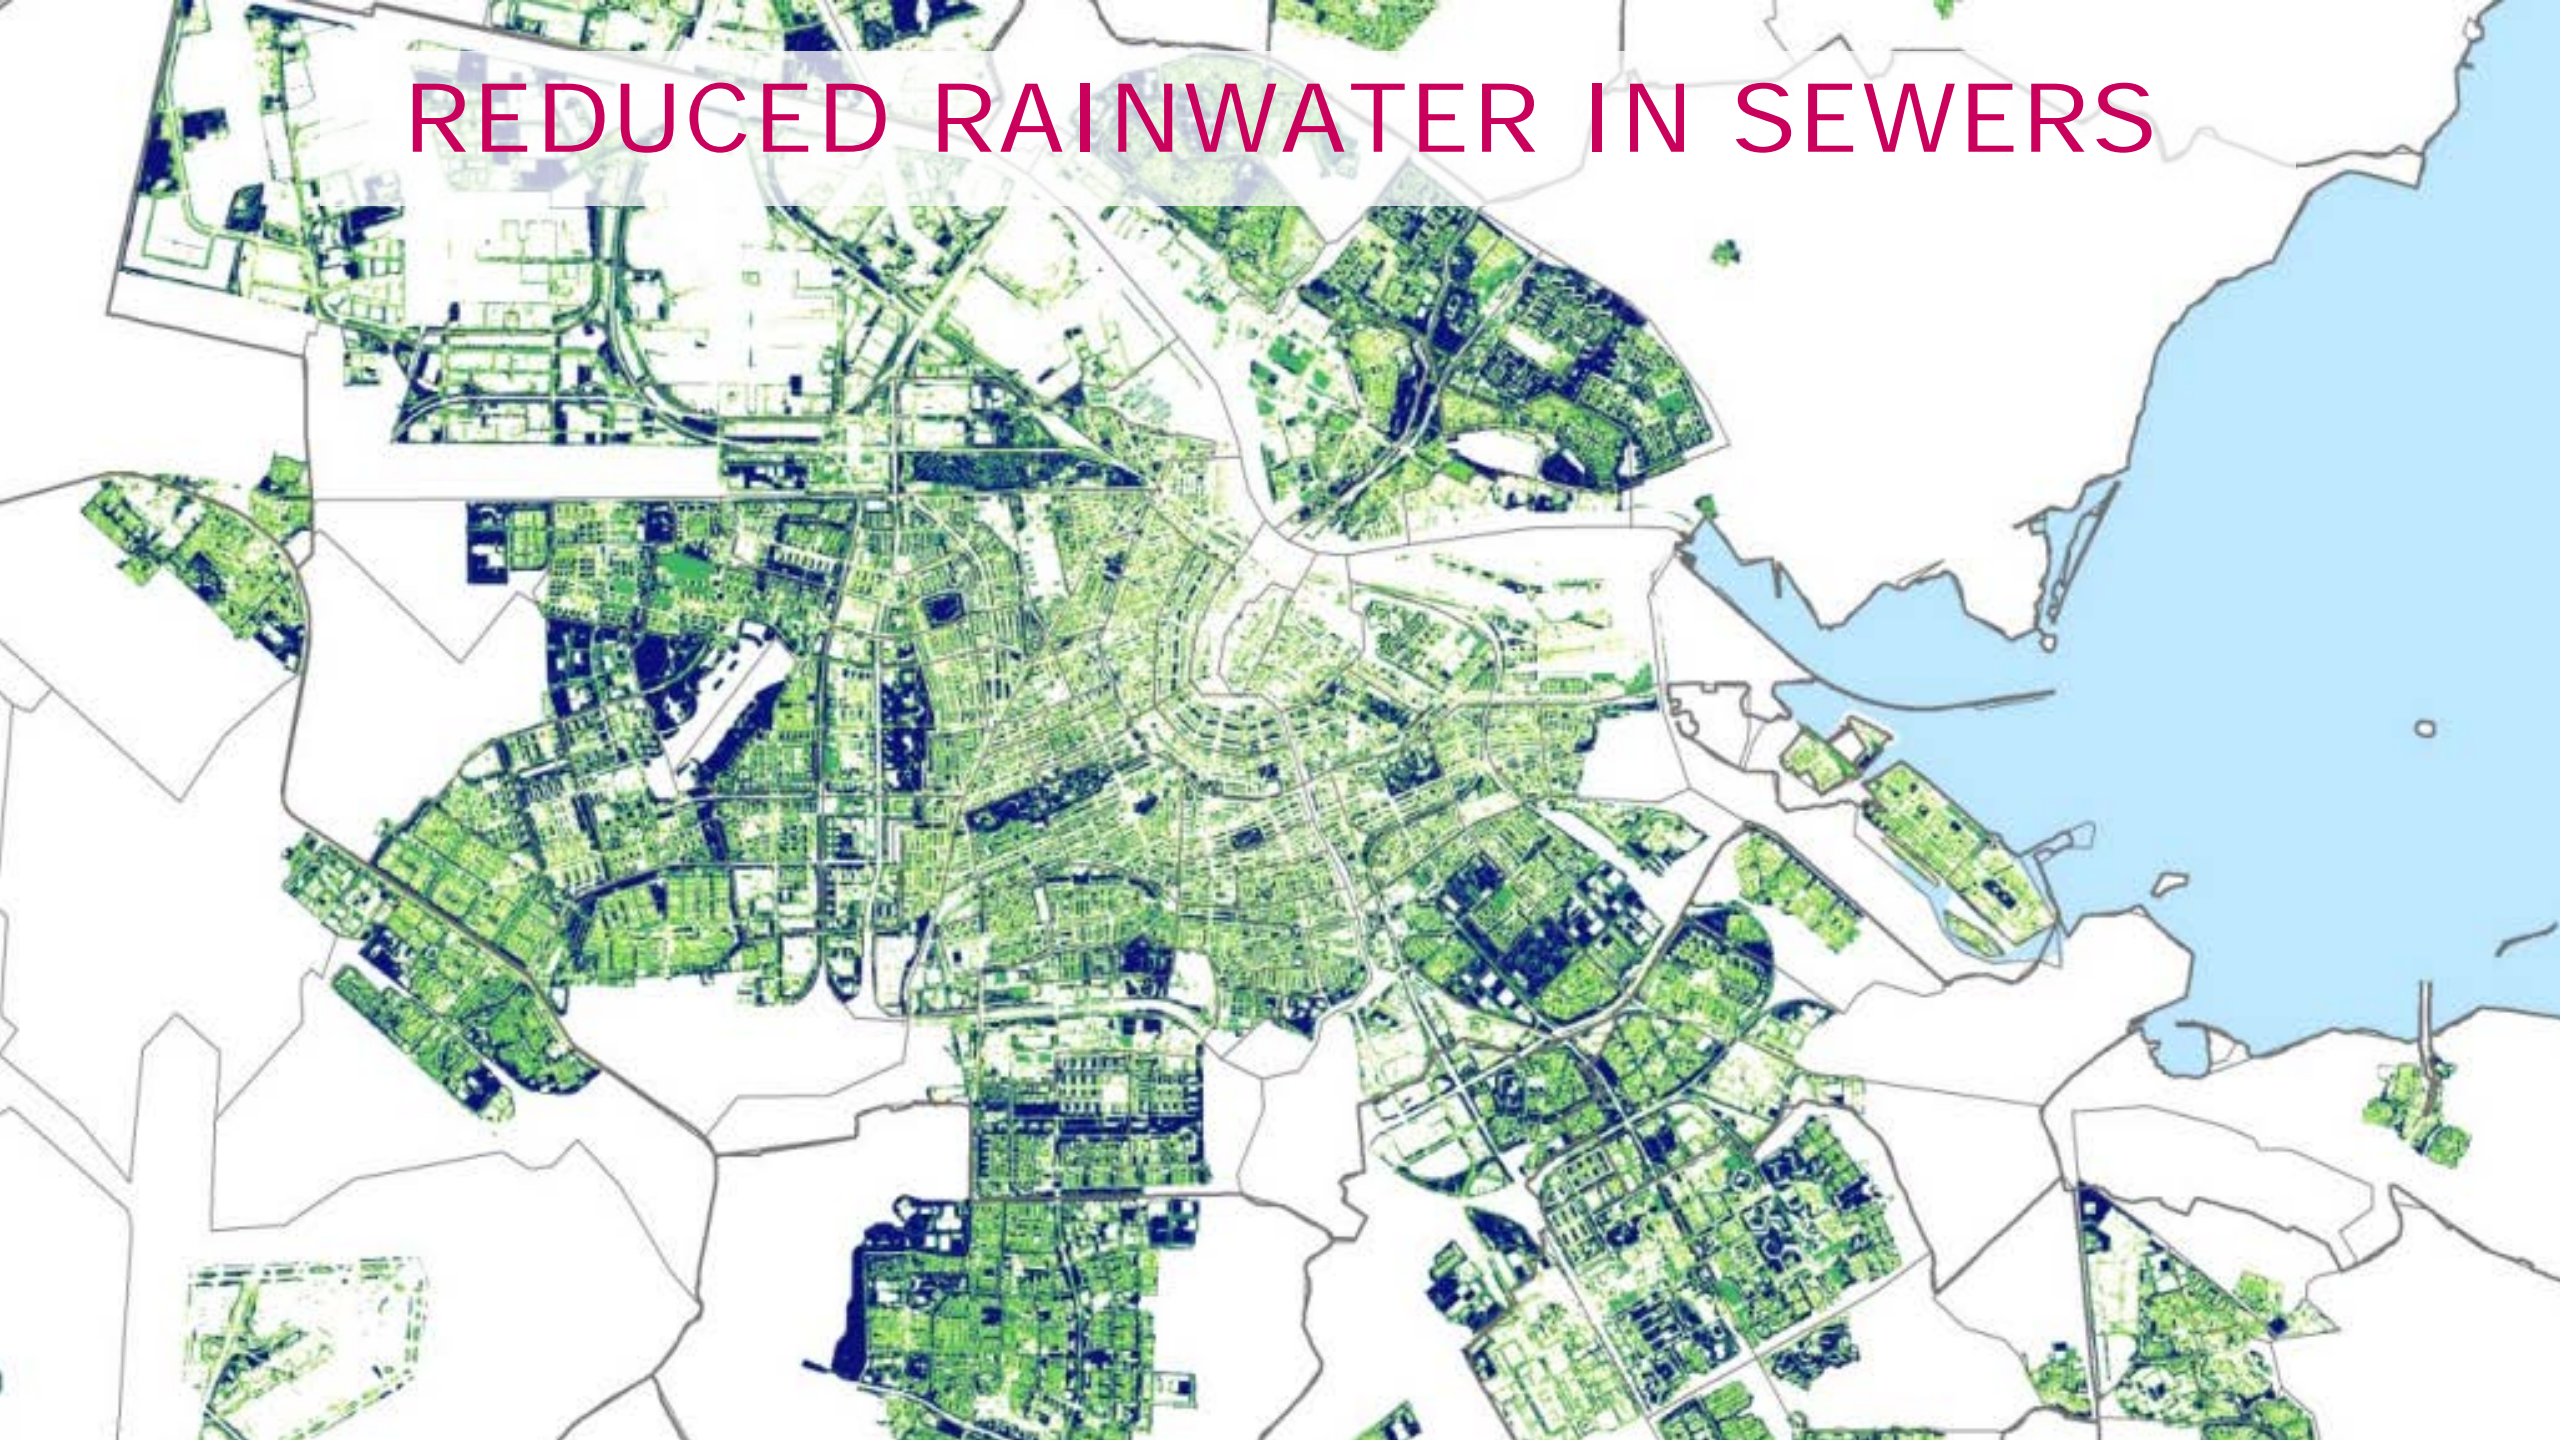

# Example

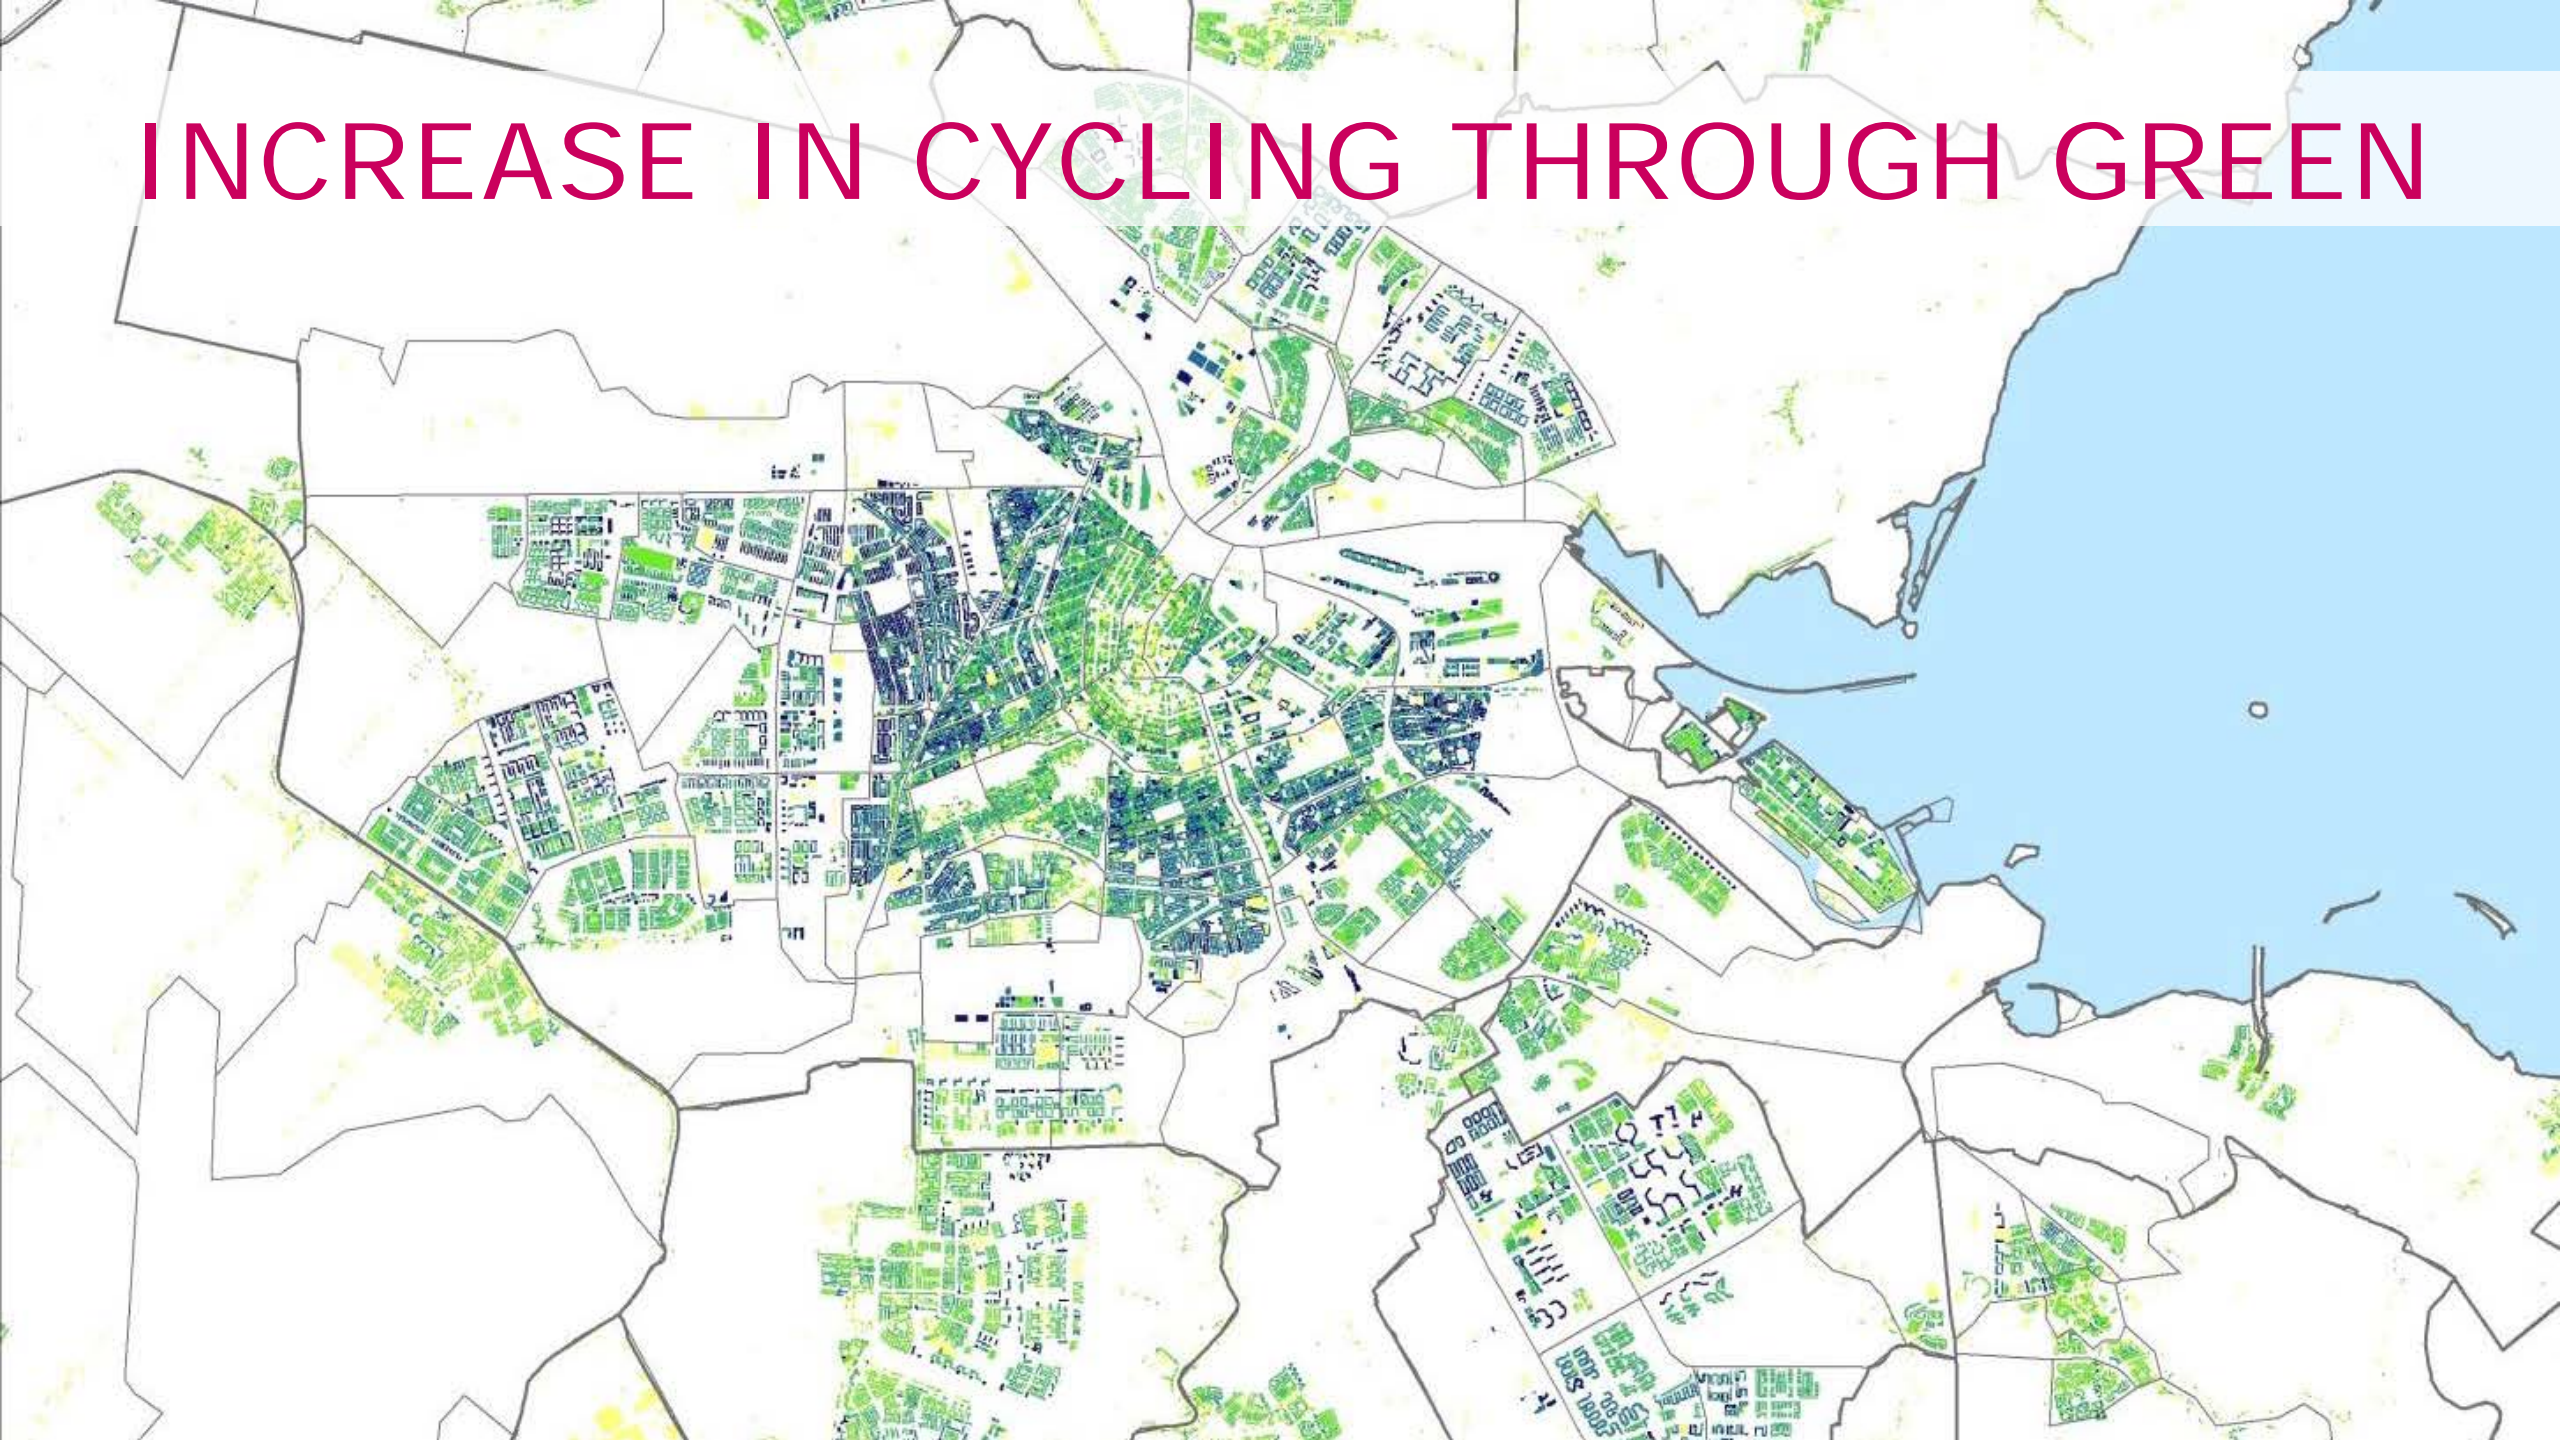

# REDUCED RAINWATER IN SEWERS

# INCREASE IN CYCLING THROUGH GREEN

# Benefits of Greening in Amsterdam

Indicator	Unit	Green Neighborhoods	Green Network	Urban parks
PM10 retention	kg/green ha/yr	9.6	-	8.9
PM10 retention	thousand €/green ha/yr	0.54	-	0.47
Reduced number of visits to GP	visits/green ha/yr	11	5	4
Reduced health costs due to urban green	thousand €/green ha/yr	10	4	3
Reduced health-related labor costs due to urban green	thousand €/green ha/yr	47	21	16
Time spent on outdoor physical activity	thousand min/green ha/yr	1.1	0.8	0.6
Time spent cycling to-from work	thousand min/green ha/yr	2.2	0.9	0.5
Avoided premature deaths from cycling to-from work	lives/green ha/yr	0.016	0.007	0.003
Avoided premature deaths from cycling to-from work	thousand €/green ha/yr	46	20	9
Contribution to property value	thousand €/green ha	202	95	40
Visits to recreation areas	thousand visits/green ha/yr	-	-	-
Visitation expenditures	thousand €/green ha/yr	-	-	-
Reduced rainwater in sewers	thousand m <sup>3</sup> /green ha/yr	4.8	2.4	2.5
Reduced water treatment costs	thousand €/green ha/yr	3.8	2.6	2.0

# Project generic connections

Steps:

Results:

Lessons learned

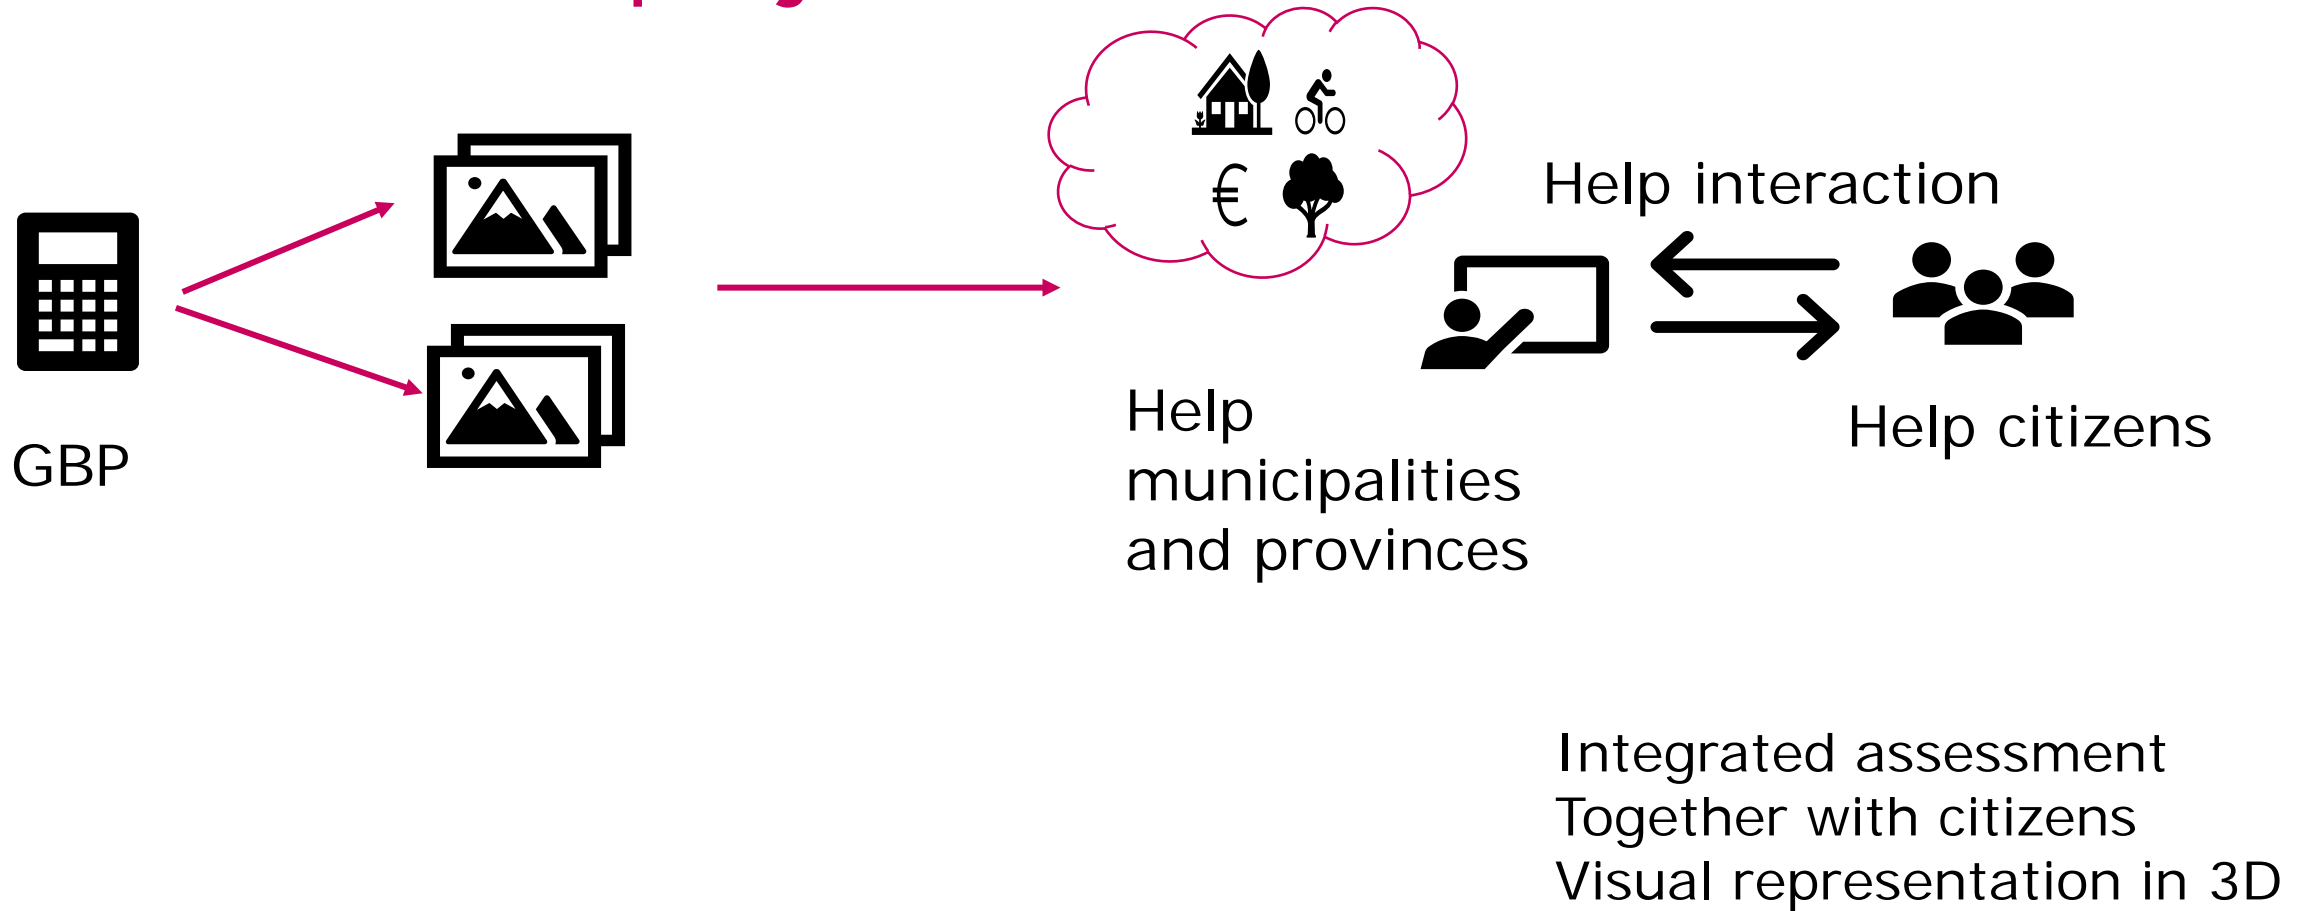

All codes and documentation public available

Gain experience with involvement of citizens

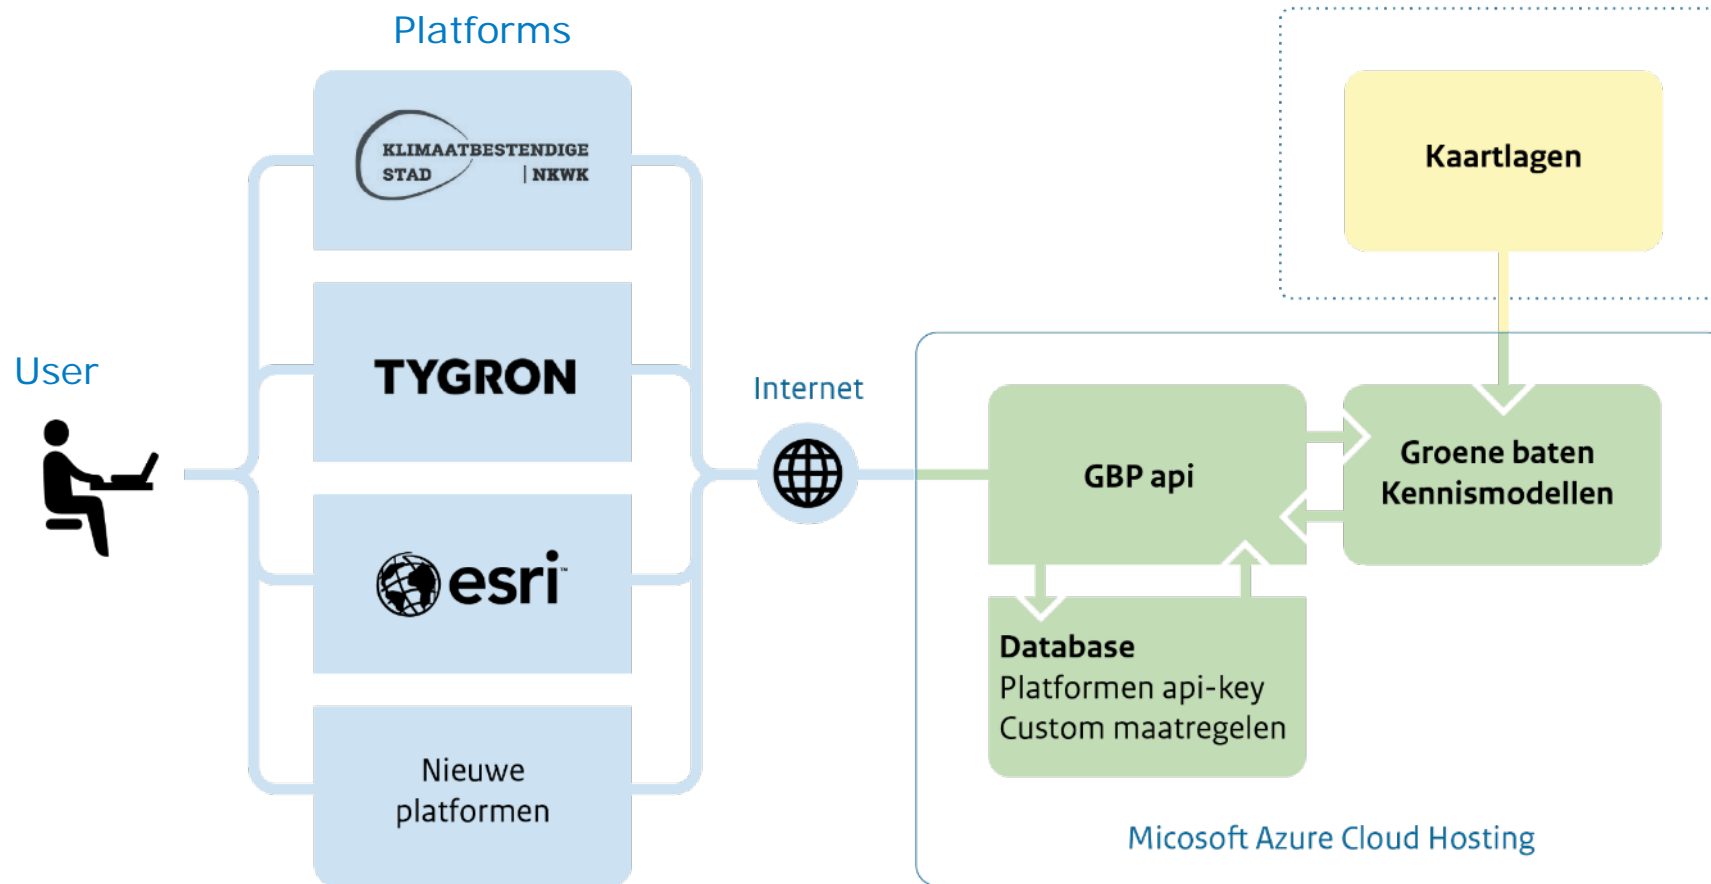

# Goal of the project

# Architecture Green Benefitplanner

Digital Twin physical living environment

# Application

## Schuilenburg Area

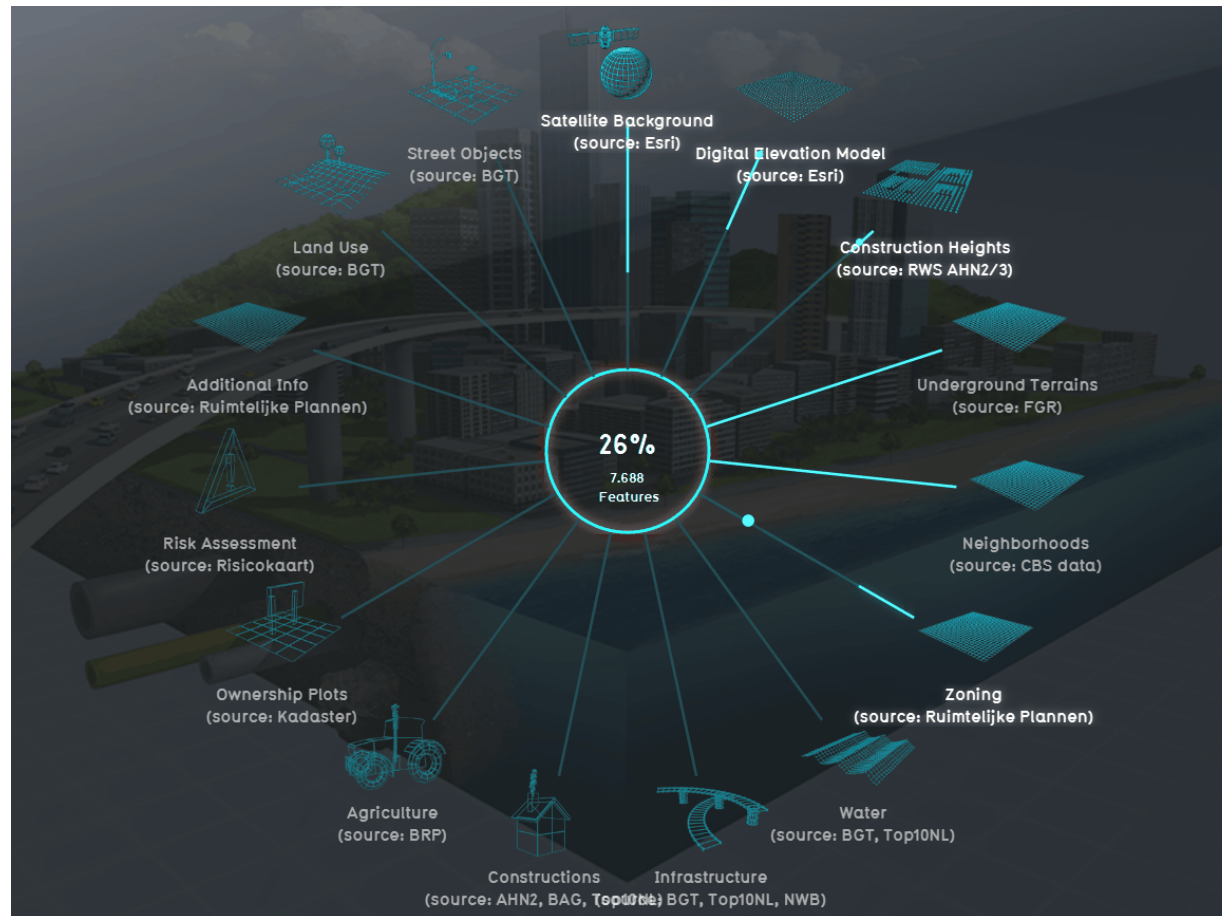

## Tygron

- > Digital infrastructure to address questions regarding spatial planning
- > Combination of (geo-)data, models & applications
- > Solve challenges: flooding, drought, heat waves, energy, housing, infrastructure, liveability and economy

# Digital Twin with Open data in Tygron

Dynamic Digital Twin based on:

- Basic registrations
- AHN 3
- Risk maps
- And many others

# GBP in Amersfoort Schuilenburg

## Groene Baten Planner van RIVM en Tygron in Amersfoort

Link kopiër...

De wijk **Schuilenburg** in **Amersfoort** in het **TYGRON** Geodesign Platform. Op basis van **open data** is een **3D Digital Twin** voor deze wijk opgebouwd.

# Application

## Nieuwe Veemarkt

## ESRI Urban modeller

- › Increase efficiency planning process
- › Overview all projects and plans in the city, 1 spot for all plans.
- › Interactive tools for experimentation with spatial plans in different scenarios

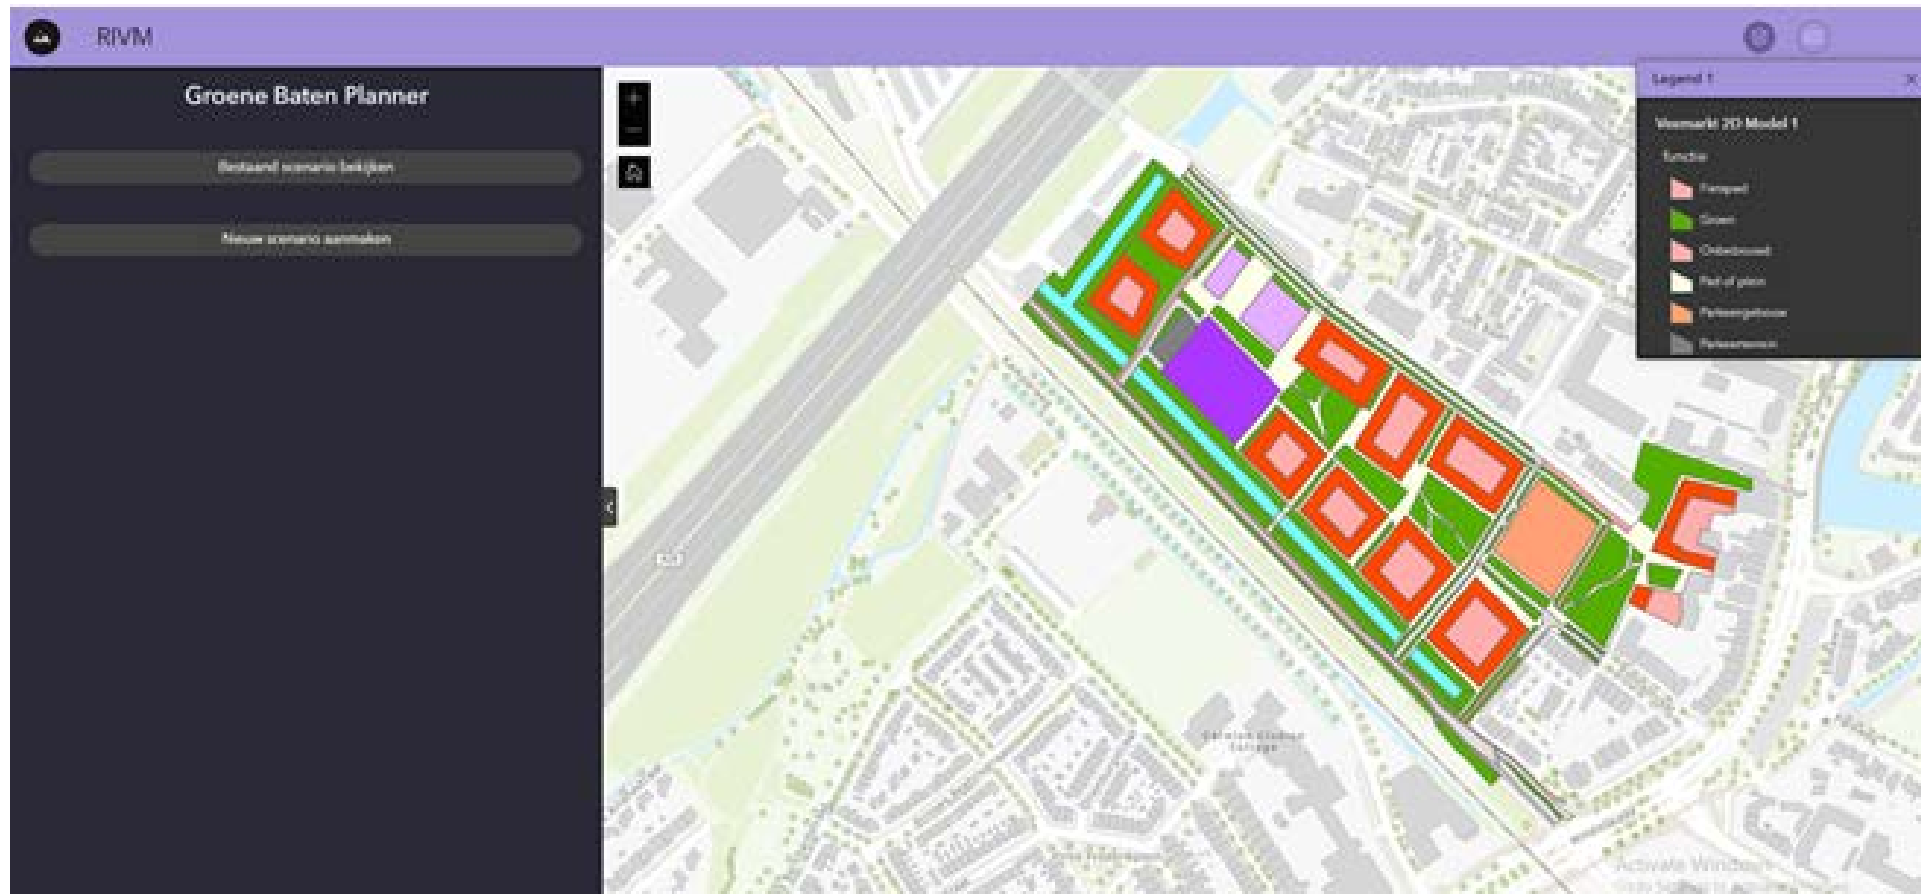

# Nieuwe Veemarkt – 3D ontwerp

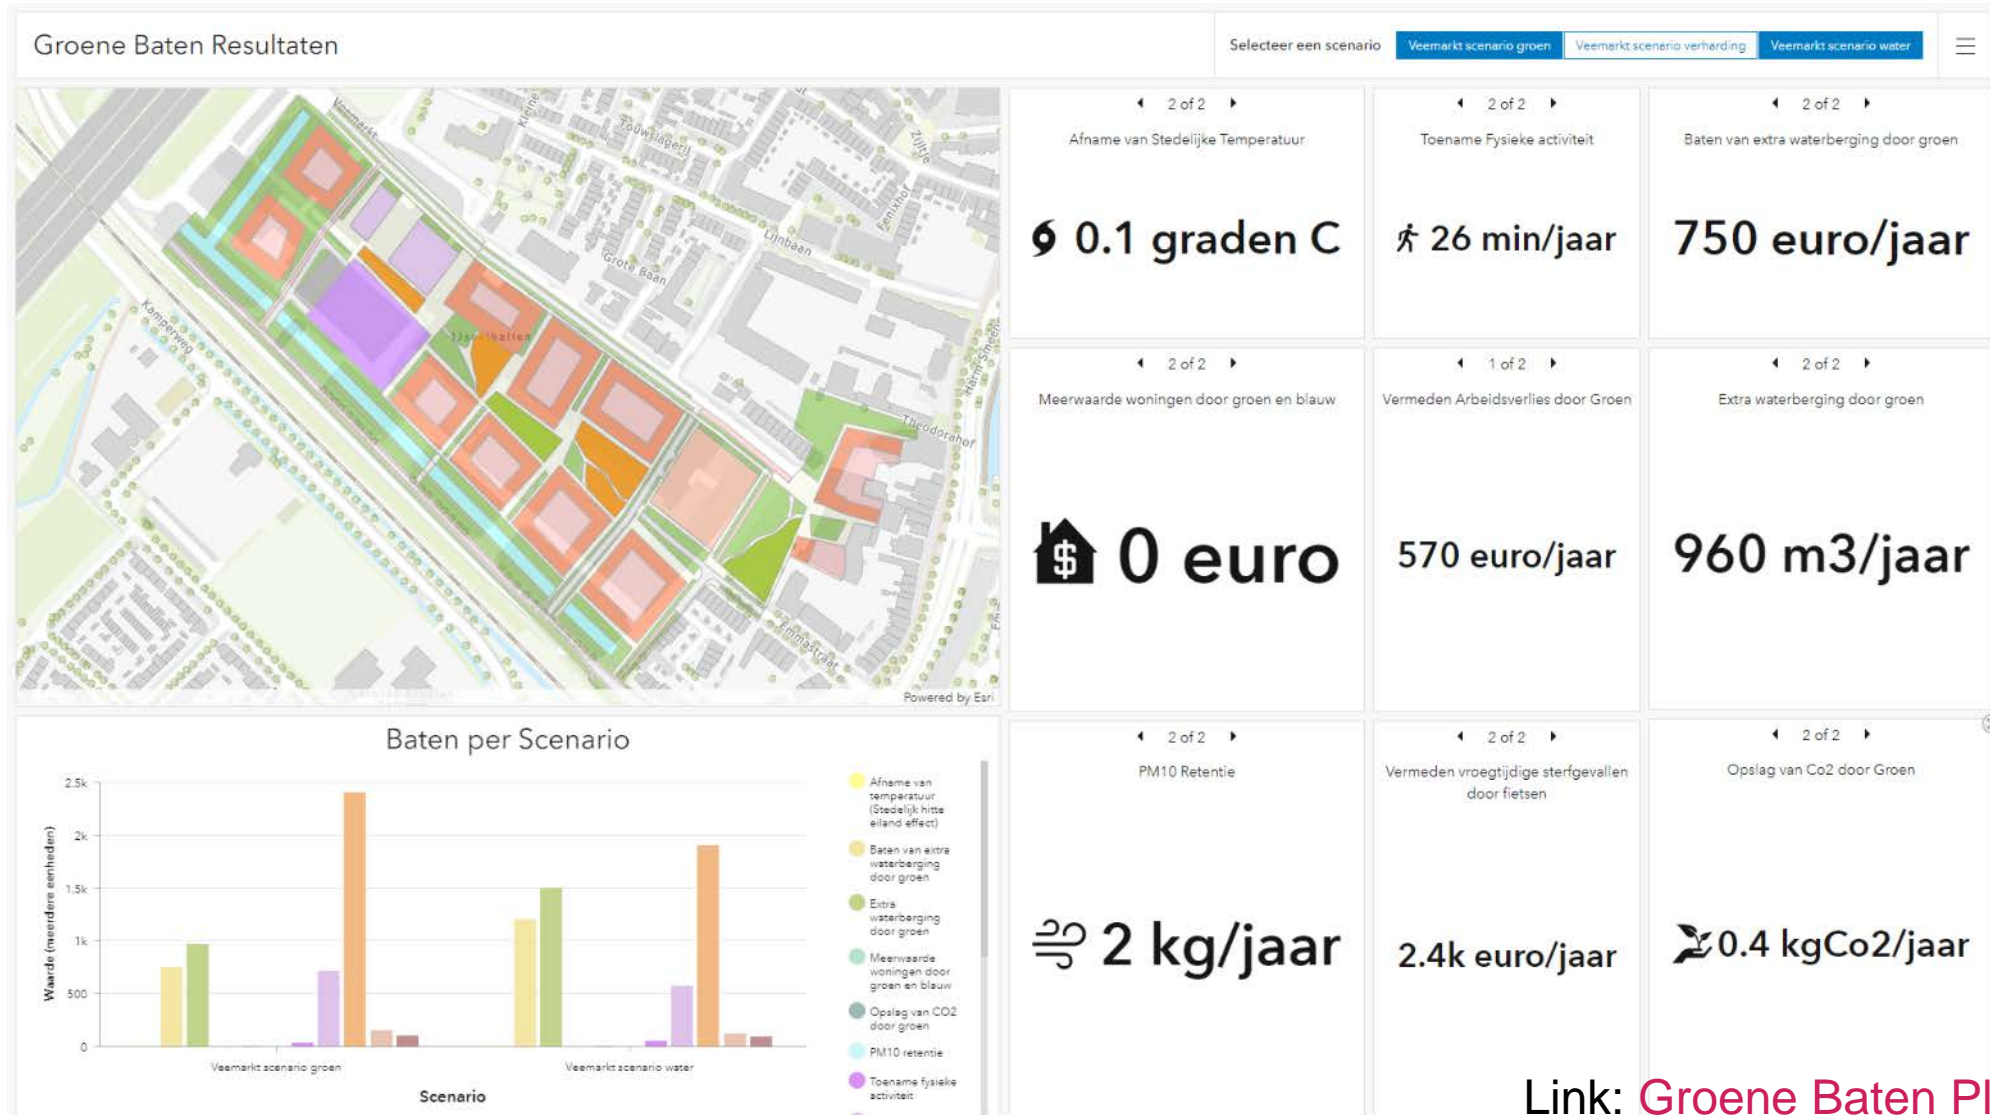

# WebApp Green Benefit Planner

# Dashboard (example)

# Lessons learned

Science-> practice

Demands new way of working

Different target groups

Tool for discussion

Integrated approach

Visualisation depends on the question and process

# Lessons learned and ambitions

- > Organise management and maintenance
  - Start up
  - Longer term

- > Generic connection
  - Tygron and ESRI
  - API key can be used by others as well

## Ambition

- > Towards a healthy and green benefitplanner
- > Develop a modular system

Data- en Kennishub  
Gezond Stedelijk Leven

## Take Home Message:

Tools for sustainable area development

- Insight into the value of nature-based solutions
- Explore solutions with stakeholders
- Test measures and possible scenarios
- Support transitions in urban areas
- Based on 'State-of-the Art' Knowledge

Green Benefit Planner
