

# ANTARC-SHIP

Fostering environmental stewardship among Antarctic tourism governance actors and institutions

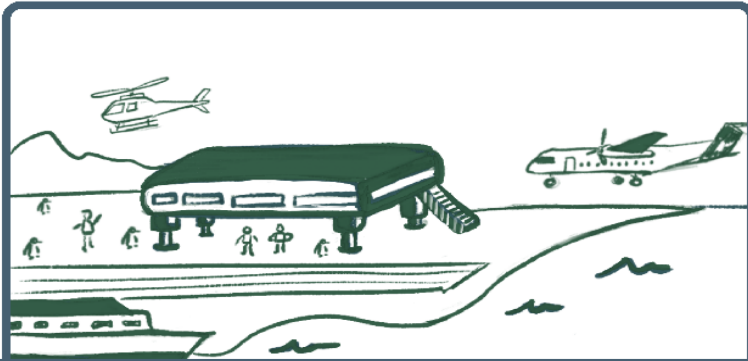

Machiel Lamers

# Objective and applicants

- To examine to what extent, and how, environmental stewardship can be assessed, enhanced, and facilitated among the different actors and institutions involved in the operation and governance of Antarctic tourism.
- Applicants:
  - Machiel Lamers (Wageningen University)
  - Bas Amelung (Wageningen University)
  - Erik Molenaar (NILOS - Utrecht University)
  - Daniela Liggett (University of Canterbury, NZ))
  - Emma Stewart (Lincoln University, NZ)
  - Javier Benayas (Autonomous University Madrid)

WP1

**Tourism & science as interdependent operations**  
Comparative impact assessment, Typology, Best-practices

WP2

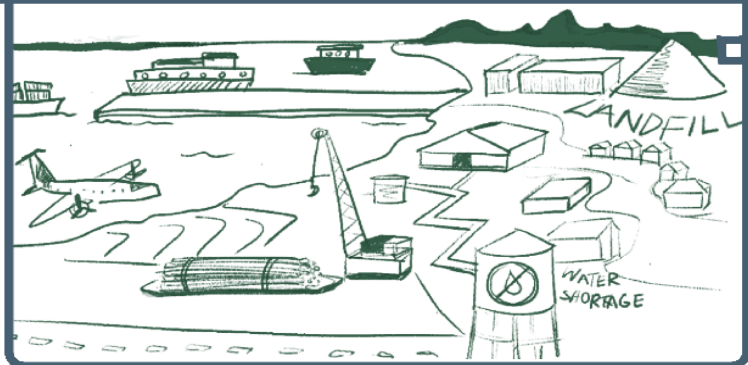

**Industry self-regulation**  
Trend analysis, Informational governance, Simulation of challenges

*Fostering Environmental Stewardship among Antarctic tourism governance actors and institutions*

# ANTARC-SHIP

How and to what extent can environmental stewardship be enhanced, operationalized and embedded among different institutional actors in the governance of tourism activities in the Antarctic region?

**Gateway cities**  
Trend analysis, Comparative impact assessment, Best-practices

WP3

**State-regulation of ship-borne tourism**  
Regulatory and governance analysis, Policy proposals
