

# Kantel en wentel (Tipping and Turning)

Come – come with me  
The road is still long but it's the right path  
Over mountains, winding trails  
Sometimes it's going our way, sometimes it's not  
Come, take my hand – let's take a leap

*Tipping and turning, yet waver and wander  
On my way to a future, I can stand for  
Tipping and turning, yet waver and wander  
On my way to a world, I am going for*

Come – come with me  
The road is still tough, but we're not alone  
We're building together  
It's not going fast, but we're going brick by brick  
Come, take my hand – let's take the leap

*Tipping and turning, yet waver and wander  
On my way to a future, I can stand for  
Tipping and turning, yet waver and wander  
On my way to a world, I am going for*

Spinning on my axis  
Faltering on one leg  
Falling flat in the grass  
Clouds revolving around me

Spinning on my axis  
Looking for balance  
Hesitation comes over me  
When will our goal be in sight?
