Fatoumata Diawara - AMBÈ Song, 2021

'Ambè' meaning 'altogether' in Bambara. It is composed during the first lockdown by Fatoumata Diawara and underlines the importance of harmony and togetherness in difficult and challenging times. The unique collaboration between female artists of African origin or descent sends a message of cooperation and a world without borders. It features Fatoumata together with Angelique Kidjo, Dianne Reeves, China Moses, Inna Modja, Somi, Mayra Andrade, Thandiswa Mazwai and Terri Lyne Carrington.

From intentions to outcomes: How to ensure that agricultural development projects empower women? (3 min, 2021)

Women and Gender in Development Virtual Conference Session: World Café. Women's empowerment is not only among the global goals guiding international development efforts toward 2030, but is also the stated goal of numerous agricultural development projects and investments. The Reach-Benefit-Empower framework, developed by the International Food Policy Research Institute (IFPRI), clearly distinguishes between

approaches that reach women as participants, those that benefit women, and those that empower women. Empowering strategies focus on strengthening the ability to make strategic life choices, which may require working with both women and men to alter intrahousehold dynamics

Uganda Insect Industry: Farmers encouraged to feed insects, (2.17 min, 2018)

Women and youth Uganda are being encouraged to feed their livestock insects. They're protein-rich and cheaper than commercially produced animal feed. Scientists in the East African nation also say breeding maggots and earthworms takes up little space compared to growing soy. Abdi Osman reports and features a woman scientist and farmer involved.

Empowering Women in Farming, Rainforest Alliance, Apr 30, 2020, 5 min.

Nearly half of the world's agricultural work is done by women, but they tend to have far less access to training and financing than their male counterparts. Providing women with equal access to these tools results in bigger crop yields, bigger incomes, and improvements to rural communities as women invest that extra money in their children's education and health. Nature benefits too, since increasing crop yields on existing farmland reduces one of the main drivers of deforestation. That's why we're working with partner organizations and rural communities around the world to fight gender inequality. To learn more about our work empowering women, check out

The danger of a single story | Chimamanda Ngozi Adichie (18 min, 2009)

Our lives, our cultures, are composed of many overlapping stories. Novelist Chimamanda Adichie tells the story of how she found her authentic cultural voice -- and warns that if we hear only a single story about another person or country, we risk a

critical misunderstanding.

[Using skits to encourage male engagement in EBF in Mozambique](#), Apr 27, 2021, 15 min

2021 Women and Gender in Development Virtual Conference Session: World Cafe Organization: Universidade Lúrio, Mozambique (21 min, 2021)

Presenter: Dr. Sofia Costa Abstract: In Mozambique and other African countries, a lack of male support in antenatal care (ANC) and health of their female partners as well as other gender inequalities contributes to low ANC participation and adverse health outcomes for women, including maternal mortality. In a low- income country context, empowering women to use ANC services, engage in exclusive breastfeeding, and take a proactive role in their own health and the health of their children will require male partners to contribute in the form of logistic, financial and psychological support. These skits are performed through a program operated by UniLúrio called One Student, One Family where students are paired with households in the communities to deliver health and nutrition counselling throughout their studies.
