## Student Career Services of Wageningen University & Research

Student Career Services supports students and recent graduates through their transition from study to career. We are experienced in the human resources field and the labour market. We work together with other career support providers, both internally and externally, and we have a large network. Students receive career advice and coaching and learn to explore the labour market. Organisations find us and share their latest job vacancies, internships and other career opportunities. We serve the whole student population of Wageningen – about 13,000 students, as well as our recent graduates (until one year after graduation) of all study programmes of WUR. Our office is located in the educational building Forum at the Wageningen Campus.

### Student Career Services offers:

- A Career Platform for organisations to post all their open positions for free. Nearly 8,000 students and recent graduates and around 800 organisations are member of the platform.
- A (highlighted) company profile on the WUR Career Platform, where organisations can boost their employer brand and publish job/internship vacancies.
- Company promotion to our students and recent graduates on our popular channels such as the WUR Career Platform, our website, our social media channels and our office at the Wageningen Campus where we meet many students and recent graduates.
- Participation in the WUR Career Day (once or twice a year). The Career Days take place each year in February and October and are meant for all students and recent graduates. The working language is English. Next to participating in the career fair, organisations can opt for 1-on-1 orientation interviews with students.
- Meet & Eat Career Event at which organisations have the opportunity to meet our students and recent graduates while sharing lunch with them. During the event, an organisation presents itself by a talk of 15-20 minutes. The event takes place from 12:00-14:00 and we offer free lunch and drinks during the event.
- Participation in the WUR Career Week. During this event (organised once a year in the Spring), a wide variety of career activities are organised to support students and recent graduates in their orientation on the labour market and transition from study to career. Organisations are invited to join the network drink with students.
- Advertisements in the Resource, the WUR (online) magazine for students and employees with an edition of 18,000 copies. The magazine is published twice a month in an English and a Dutch version. You can also opt for an online banner on the Resource website.

## More options to collaborate with Wageningen University & Research

### Real-life learning experiences for students

- Guest lectures: via endorsement lecturers, if it fits within the objectives and context of the relevant educational element.
- Student Consultancy Projects: connecting your organisation's real-life assignments with the education of the University. For example, we host the Academic Consultancy Training course, where a group of Master's students explore real-life cases as young consultants in a learning environment.
- Student Challenges: international student teams develop innovative ideas and solutions to societal challenges. Organisations can support through coaching and sponsoring.
- Hackathons: young talents work on targeted challenges, side by side with organisation representatives.

### Continuing education

To tackle the major global challenges our society is facing, Wageningen University & Research educates professionals around the world by offering high quality knowledge on healthy food and the living environment. WUR focuses on 'lifelong learning' educational ecosystems, ranging from MBAs and postgraduate study programmes to summer schools, online courses and MOOCs. We also offer tailor-made and in-company training for professionals. Wageningen Centre for Development Innovation as well as Wageningen Academy can organise these for you.

---

### **We can facilitate contact with:**

- Our campus managers, for activities on campus, sharing research facilities and campus orientation.
- Relevant study- and student associations.
- Our research experts and contact persons for chair groups and research institutes.
- Our alumni.
- StartLife: growing Food & Agtech start-ups into leading enterprises.
- FabLab: from drawing and editing 3D models to helping with laser cutting work and 3D printing jobs.
- Welcome Center Food Valley specialises in immigration services for your highly skilled, international, future employees.

If you are interested in more options to collaborate with Wageningen University & Research, or if you want to contact other stakeholders here at WUR, Student Career Services can be your point of contact as well.

# Your 12-month partnership with WUR Student Career Services

Wageningen University & Research has excellent students in the domain of life sciences. With a Partnership, Student Career Services offers you the opportunity to meet our talented students and recent graduates for recruitment purposes and to boost your Employer Brand. With a Partnership, there are different options to choose from. You can choose a Plus or Premium Partnership, all with fixed fees. The Basic options are for free. The fee is for a period of 12 months and you will receive a contract which includes your wishes. Alternatively, you can make a tailor-made Partnership agreement, where you can choose your preferred activities. The fee for this is calculated based on which activities you select.
