	Secure machine translation	Secure machine translation with post-editing	Human translation with revision
I just want to know what the text is about	✓	✓	✓
I want to write/ internally share an informal text	✓	✓	✓
I want to use this text for business	✗	✓	✓
I want to publish/ externally share the text	✗	✗	✓

Our machine translations are made with advanced translation software combined with a DeepL Pro licence. The advantages:

- ✓ texts are translated in a secure environment
- ✓ texts are not shared with third parties
- ✓ the ownership remains with the author(s) of the text
- ✓ texts are translated consistently with WUR terminology and previous translations

The same principles apply to our human translations with revision, and these are made by a professional translator and expert reviser, thus meeting the quality seal of ISO 17100:2015.
