ID: 3

THE TOUCH TABLE
The Touch Table is a digital platform, which allows several users to see and to manage a large amount of data in such a way that it promotes discussion and decision making. The Touch Table's unique design and interface can benefit a wide variety of applications.
TouchTable Systems provide you with a powerful way for accessing, sharing and managing data

OBJECTIVE
The main objective of this project is to use the possibilities of the Touch Table to generate a discussion which is valuable in the process of coming to a Village Energy Plan including stakeholders from the local community.

What did they do

Participants are having fun, a lot of pictures are taken, not only by us but also by employees of municipality and citizens.

A participant makes the comment that it is nice to immediately start drawing on such a table and be able to adjust it

What did they say

"THE CHICKEN FARM IN THE AREA IS PRODUCING A LOT OF MANURE. THERE SHOULD BE A CO-DIGESTER THERE."

"THIS IS A FACTORY AREA AND CAN BE USED FOR MULTIPLE ENERGY OPTIONS"

"CO-DIGESTER SMELLS BAD, DO NOT WANT IT CLOSE TO MY HOUSE"

"DO NOT FORGET TO KEEP YOUR HANDS CLEAN!!!"
E.G. THE TOUCH TABLE WILL NOT RECOGNIZE HANDS COVERED WITH CARBON.

How does it look

Energy options

N

Legend
- Co-digester
- Small turbines
- Soltech
- V3
- floating PV
